

Cameron Mitchell Productions

brings high quality Video Production
to the Wine, Food and Hospitality industries.

We specialize in shooting beautiful imagery of your facility, conducting interviews with your key principals, staff and customers (optional), and adding music and/or narration to create an exciting, informative video experience.

Depending on your needs these videos can be used to promote your business, enhance your image, inform your customers, and inspire your employees. Video can be a powerful medium for telling your company's story – its history, its philosophy, and what makes it unique.

There's many possible venues for presenting your video message, such as:

- your tasting room
- your web site
- as a DVD in your press kits
- as a DVD give-away at wine festivals
- uploading to MySpace, Facebook, and YouTube

Our associates, which include Directors, Writers, Videographers, and Editors, bring a wide range of talents honed in decades of Television, Film and Video production. We're used to working with a wide range of budgets, and take pride in tailoring the production to the resources available while achieving the highest possible quality in our work.

**Call or email if you'd like a consultation,
to see our work, or discuss your needs.**
